

What Is a Shielding Lotion™?

Unprotected skin

 Moisture-robbing Irritants
 Moisture

A Shielding Lotion™ bonds with the outer layer of skin cells, enhancing the skin's ability to retain natural oils and moisture while protecting from irritants, harsh soaps and common household and cosmetic products which strip moisture out.

Conventional lotions merely mask dry skin symptoms with ingredients that “moisturize” artificially.

Protected w/ Gloves In A Bottle®

 Moisture-robbing Irritants
 Moisture

Have you ever started using a moisturizer for dry skin - only to find that when you stopped using it, your skin was drier than before?

Only natural moisture and oils below the outer layer of skin can actually resolve a dry skin condition.

Shielding Lotions™ are a more natural solution because they help restore the protective qualities of the outer layer of skin and retain natural oils, lipids and moisture which resolve dry skin conditions from within.

“What really works best for helping dry skin is your own natural oils. Gloves In A Bottle® helps take care of the skin in ways that medications can’t... It forms a natural invisible shield and your own natural oils are left there to do their job.”

Dr. Peter Helton,
Board Certified Dermatologist
